OUTCOMES

**"THIS 10 YEAR DROUGHT
IS UNPRECEDENTED.
SO WE MUST ALL CUT OUR
SHOWERS TO 4 MINUTES."**
Prof. Michael Manton, Meteorologist.

"It's a drought that's been made even worse by climate change. And the seasonal outlook suggests there's no sign of it breaking in the near future. So everybody's got to save water. And the best way to do it is by cutting our showers to less than four minutes." Visit target155.vic.gov.au for more ways to save water.
